

**Aleksander Figiel**  
**Fullstack Software Engineer**  
JavaScript, TypeScript

I specialize in architecting greenfield, cloud systems written full-stack in TypeScript.  
I like to set up a coding environment to have a productive developer workflow (out-of-the-box configuration, automation, traceability) with fast feedback loop for great DX.  
Currently, I prefer to use Vue3.js, Node.js and macOS for projects in monorepo.

hobby	self development, reading, science

## Experience

2023 - current	Tech Leader	<a href="#">Statscore</a> , Katowice/Hybrid
2020 - 2023	R&D Software Architect	<a href="#">RTB House</a> , Warsaw
2019 - 2020	Senior Software Engineer	<a href="#">McKinsey &amp; Company</a> , Warsaw
2016 - 2018	Team Lead Developer	<a href="#">frosmo.com</a> , Helsinki
2015 - 2016	Software Architect	startup co-founder, Wrocław
2011 - 2015	Software Engineer	<a href="#">fream.pl</a> , Wrocław
2010 - 2011	Java EE Developer	<a href="#">xantus.tv</a> , Wrocław
2006 - 2012	MSc Robotics	<a href="#">University of Technology</a> , Wrocław

## Skills

frontend		
	design	Figma, Photoshop
	layout	HTML5, CSS3, SCSS
	JavaScript	vanilla JS, ES2015+, Vue.js, TypeScript, React, Angular 1, jQuery
backend		
	architecture	REST, microservices
	database	SQL (PostgreSQL, MySQL), BigData (BigQuery), NoSQL (Redis)
	JavaScript	Node.js, Express.js, Koa.js
	Java EE	JSP, EJB
tools		Nx, Lerna, Webpack
testing		Vitest, Storybook, Playwright, Jest
other		Github Actions, Docker, Code Review, Bash, Design Patterns
cloud		Google Cloud Platform, AWS
version control		Git, SVN
servers		Nginx, Linux server architecture & configuration
certificates		English B1, Computer Network Security, Mindfulness

**Aleksander Figiel**  
**Fullstack Software Engineer**  
JavaScript, TypeScript

## Experience (12 years, 30+ projects)

2020 - current                                      R&D Software Architect                                      [RTB House](#)

Designing from scratch (monorepo architecture, build, deploy, development environment) system for processing & visualization for real-time data from warehouses. Project was architected and developed by myself, then I have been Technical Leader for the 3-devs team.

Backend: Node.js, Koa.js, TypeScript, MySQL, BigQuery  
Frontend: Vue3.js, TypeScript

2019 - 2020                                      Senior Software Engineer                                      [McKinsey & Company](#)

Full-stack developer (React.js 16, Node.js) of in-house analytical software in a 10 person team.  
Involved in DevOps responsibilities (Bash, CircleCI).

2016 - 2018                                      Team Lead Developer                                      [frosmo.com](#)

Team Lead Developer in a group of 5 developers. I cooperated with multiple Project Managers to deliver new features for big e-commerce companies operating on legacy systems (Decathlon, MediaMarkt, etc.).  
Invented & developed company platform extensions allowing to use modern JavaScript: ES2015+, Node.js

2015 - 2016                                      Software Architect                                      startup co-founder

Architect of stock market predicting software in a 5 person team.  
I built from scratch a secure Linux server. JavaEE server with Angular 1 Gui allowed to run instances of proprietary, existing prediction algorithm written in Fortran, with significant performance boost.

2011 - 2015                                      Software Engineer                                      [fream.pl](#)

Co-architected and developed [traffic.naviexpert.pl](#) as Single Page Application using Leaflet.js.  
Bootstrapped and full-stack developed Java EE systems for startups and big companies.

2010 - 2011                                      Java EE Developer                                      [xantus.tv](#)

Developing full-stack Java EE systems with HTML/CSS frontend generated on backend (JSP), writing vanilla JavaScript and jQuery, writing ORM queries with Hibernate on top of PostgreSQL.
